## vi Command Summary

		Movement Commands		Editing Commands
First   Let   Charge   First   Charge   First   Let   Charge   First   Let   Charge   First   Char				
Forward, backward by word   Beginning of next, previous sentence   First character position of current line   First character of next, previous sentence   First character of next, previous sine   Column n of current line   First character of next, previous sine   Column n of current line   Top line of screen   T	h, j, k, l	$(\leftarrow,\downarrow,\uparrow,\rightarrow)$		
End of word Beginning of next, previous sentence  Lines  Lines  First, last position of current line First character of ourrent line (prore spaces) First character of next, previous line Column not of screen Middle line of screen Reposition current line to pot screen Reposition current line to bottom of screen N. N. Repeat previous search forward, backwards for expr Repeat late search in same, opposite direction Repeat previous current-line search Reposition cursor on line n Repeat previous current-line search in opposite direction Repeat previous current-line search in search Repeat previous current-line search line search Repeat previous current-line search line opposite direction				
Lines  Lines  Series i last position of current line First character of current line (ginore spaces) First character of next, previous line Column not current line (ginore spaces) First character of next, previous line Column not current line (ginore spaces) First character of next, previous line Column not current line (ginore spaces) First character of next, previous line Column not current line (ginore spaces) First character of next, previous line Column not current line to ginore spaces Middle line of screen Bottom line of screen Middle line of screen Bottom line of screen In (number) of lines after top of screen In (number) of lines after top of screen In (number) of lines after top of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to middle of screen Reposition current line Reposition current line Reposition current line screen Reposition current line screen Reposition current line Reposition current line screen Repositio				Open a new line for text below, above cursor
Lines  O. S.  First, lest position of current line O. S.  M. Middle line of screen I. M. Model in on of screen I. M. Model line of screen I. Seculi lown, up one-stall organ I. S.  First, lest position of current line of pol screen I. M. Model line of screen I. M			_	B 1 20 11 1
Lines  0. \$ First, last position of current line Prist character of current line (gnore spaces) + First character of current line (gnore spaces) +	), (	Beginning of next, previous sentence		1 '
Command m (w or of L for word or line)				
Cange current line   Cange c	Lines		CIII	
First character of next, previous line Column not current line (ignore spaces) First character of next, previous line Column not current line Top line of screen MM Middle line of screen MIddle line of screen Bottom line of screen MIddle line of screen Reposition current line to bottom of screen Reposition current line to bottom of screen MIDDLE line character before cursor MIDDLE line character line line line line line line line line	0, \$	First, last position of current line	CC	,
## Type over characters and substitute text     Column or Journet line   Column or Journet line				
H M Middle line of screen L Bottom line of screen n/H m/ (number) of lines after top of screen n/L (number) of lines after top of screen n/L (number) of lines before bottom of screen Screens Ctri-F, Ctri-B Ctri-D, Ctri-L Ctri-C, Ctri-C Scroll forward, backward one screen Scroll down, up one-half screen Scroll down, up one-half screen Scroll down, up one-half screen Reposition current line to middle of screen Reposition current line to bottom of screen N/Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to middle of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line search Reposition current line	+			
Middle line of screen Bottom line of screen In (number) of lines after top of screen In (number) of lines after top of screen In (number) of lines after top of screen In (number) of lines before bottom of screen Screens Crtl-F, Crtl-B Crtl-D, Crtl-U Scroll down, up one-half screen Show one more line at bottom, top of screen Reposition current line to top of screen Reposition current line to indide of screen Reposition current line to indide of screen Reposition current line in the lot pot screen Reposition current line to indide of screen Reposition current line to bottom of screen Reposition current line to bettom of screen Reposition current line number Fix Search backwards for expr				Delete character and substitute text
Bottom line of screen		l '	S	Delete current line and substitute text
In (number) of lines after top of screen n (number) of lines after top of screen n (number) of lines before bottom of screen n (number) of lines before bottom of screen   Screen   Scroll flown, up one-half screen   Show one more line at bottom, top of screen   Show one more line at bottom, top of screen   Reposition current line to top of screen   Reposition current line to indide of screen   Reposition current line to bottom of screen   P. P. P.   P.   P.   P.   P.   P.				
Screans CIT-F, CITI-B CITI-B, CITI-V				
Screens   Ctrl-F, Ctrl-B   Scroll forward, backward one screen   Scroll down, up one-half screen   Show one more line at bottom, top of screen   Show one more line at bottom, top of screen   Reposition current line to top of screen   Reposition current line to top of screen   Reposition current line to middle of screen   Reposition current line to middle of screen   Reposition current line to middle of screen   Reposition current line to bottom of screen   P.				other commands put you in insert mode
Ctrl-F, Ctrl-B Ctrl-D, Ctrl-Y Ctrl-E, Ctrl-Y Ctrl-E Ctrl-G Ctrl-		77 (Turnbor) of mice potent potential of coroon	Delete, Move	
Ctrl-E, Ctrl-U ZRETURN ZRETURN Show one more line at bottom, top of screen Reposition current line to top of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to bottom of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to bottom of screen Reposition current line to bottom of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line bottom of screen Reposition current line bottom of screen Reposition current line to bottom of screen Reposition current line bottom of screen Reposition are screen Reposition current line bottom of screen Reposition are screen Reposition current line bottom of screen Reposition are screen Reposition current line bottom of screen Reposition current line bottom of screen Repositi		Scroll forward, backward one screen	1	Delete character
Zerturn Reposition current line to top of screen Reposition current line to middle of screen Reposition current line to middle of screen Reposition current line to bottom of screen Reposition current line to bottom of screen P.	·			Delete character before cursor
Z- Reposition current line to middle of screen Reposition current line to bottom of screen  Reposition current line to bottom of screen  Reposition current line to bottom of screen  Reposition current line to bottom of screen  Reposition current line to bottom of screen  Reposition current line to bottom of screen  Reposition current line bottom of screen  Reposition current line to bottom of screen  Reposition current line scarch forward for expr  Search backwards for expr	Ctrl-E, Ctrl-Y	Show one more line at bottom, top of screen	d <i>m</i>	Delete text block defined by movement
Reposition current line to bottom of screen   D	_			
Searches  /expr /expr /expr Search backwards for expr Search backwards for expr N. N Repeat last search in same, opposite direction Repeat previous search forward, backwards for Search backwards for expr N. N Repeat last search in same, opposite direction Repeat previous search forward, backwards for Search backwards for expr N. N Repeat last search in same, opposite direction Repeat previous current line Search backwards for character x in current line Repeat previous current-line search Repeat previous current-line Repeat last edit command Undo last edit, restore current line Join two adjacent lines Redraw screen  Wark current position as x Return cursor to x Return to previous mark Return to perioning of line containing x Return to beginning of line containing x Return to beginning of line containing revious mark  "(2 apostrophes)  Vi file Vi + file				
Searches   Search	Z-	Reposition current line to bottom of screen		
Search   Search   Search   forward for expr   Search				· ·
Search forward for expr   Search backwards for character x in current line   Search backwards fo	Soarchos			Put text from delete buffer <i>n</i> after cursor
Search backwards for expr   Repeat last search in same, opposite direction   Repeat previous search forward, backwards   Search backwards for character x in current line   Search backwards for character x in current line   Repeat previous current-line search   Put yanked text after, before cursor   Put yanked text afte		Search forward for ever		Vank (conv.) text block defined by movement
n, N Repeat last search in same, opposite direction for the provious search forward, backwards for character x in current line Search backwards for character x in current line Repeat previous current-line search in expeat previous current-line search forward for character x in current line Repeat previous current-line search in expeat previous interest in expeat pre			yiii
